

Today is Earth Day. People all over the world celebrate it on 22nd April. Our planet is sick because we do not take care about it. It is our only home. How can we save it? I always do my best to protect our planet. I turn off the lights when I leave my room and I don't leave the water running while brushing my teeth. My mum recycles paper and plastic bottles and my dad goes to work by his bike. Every spring we plant flowers in our garden. We help our planet to stay green and healthy. Today we are having fun in our garden. We are planting roses. My mum likes roses because they are beautiful. My brother is riding his bike, and my dad is feeding the birds. We love our garden and we love our planet. You can also help save the Earth!

Mary
