

Counting change

Use a calculator and calculate the amount of change for each question. Write the amount of change to get in the boxes.

Amount I pay - cost of item = change

Example:

I pay:

Cost:

How much change do I get back?

$$\$60 - \$56.20 = \underline{\underline{\$3.80}}$$

I pay:

Cost:

How much change do I get back?

\$

I pay:

Cost:

How much change do I get back?

\$

I have:

Cost:

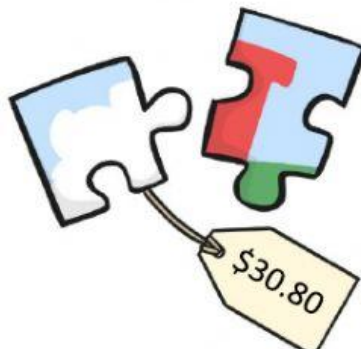

How much change do I get back?

\$

I have:

Cost:

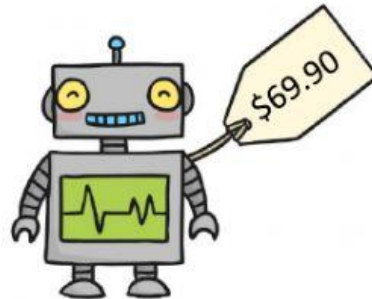

How much change do I get back?

\$

I have:

Cost:

winkl.co.uk

How much change do I get back?

\$

I have:

Cost:

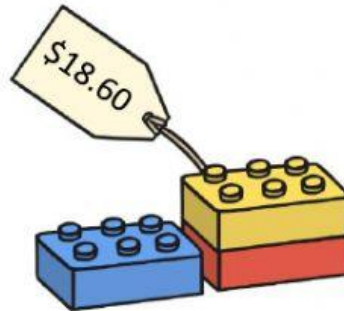

How much change do I get back?

\$

I have:

Cost:

How much change do I get back?

\$

I have:

I want to buy:

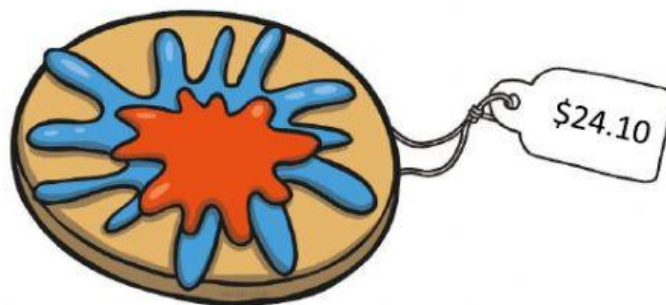

How much change do I get back?

\$

I have:

I want to buy:

How much change do I get back?

\$

I have:

I want to buy:

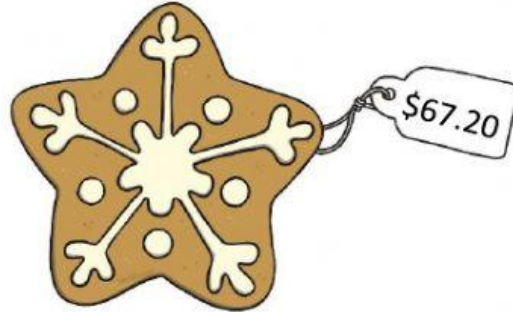

How much change do I get back?

\$

I have:

I want to buy:

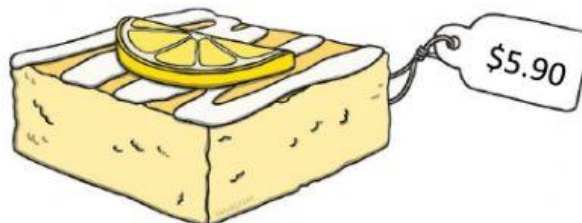

How much change do I get back?

\$

I have:

I want to buy:

How much change do I get back?

\$
