Who earns the most money?

Who spends the most money?

How much does each child save in a month?

	Weekly Savings	Monthly Savings
Sam	<b>\$20.00</b>	<b><math>\\$20.00 \times 4 = \\$80.00</math></b>
Bob	\$	\$ x = \$
Eve	\$	\$ x = \$
Jill	\$	\$ x = \$

Each child is trying to save \$180 to go on school camp.

How long will it take each child to save \$180?

Sam	weeks	<b>Thinking</b>	<b><math>\\$20.00 \times</math></b>	<b><math>= \\$180.00</math></b>
Bob	weeks	<b>Thinking</b>	<b><math>\\$ \times</math></b>	<b><math>= \\$180.00</math></b>
Eve	weeks	<b>Thinking</b>	<b><math>\\$ \times</math></b>	<b><math>= \\$180.00</math></b>
Jill	weeks	<b>Thinking</b>	<b><math>\\$ \times</math></b>	<b><math>= \\$180.00</math></b>

If Sam wants to save \$140 a month, how much extra money would he have to earn each month? \$ **My thinking**

If Sam wants to save \$140 a month, how much extra money would he have to earn each week? \$  $\$ \div 4 = \$$

If Eve wants to save \$100 a month. How much extra would she have to save?

**She would have to save an extra \$ a month or \$ a week**

If Eve wants to save \$100 a month. How much could she spend on tuckshop each week?

**To save an extra \$ a week she would have to spend \$ less every week on tuckshop**

**She would have to spend \$ a week on tuckshop.**

If Jill wants to save \$60 a month, how much would she need to reduce her magazine subscription to?

**She would need to save an extra \$ a month or \$ a week**

**To save an extra \$ a week she would have to spend \$ less every week on magazines**

**She would have to spend \$ a week on subscriptions.**

How much would Bob save a month if he didn't buy tuckshop?

Bob saves \$       a month.

If he didn't buy tuckshop he would save an extra \$       a week which is \$       a month

Altogether Bob would save \$       a month if he didn't buy tuckshop.

How much would Eve save every month if her mother doubled her pocket money? \$

Eve saves \$       a month.

If she doubled her pocket money she would save an extra \$       a week.

This means she would save an extra \$       a month

Altogether Eve would save \$       a month if she doubled her pocket money.
