

Toba Lake

Danau Toba or Toba Lake is one of the most popular destinations in Indonesia. It is located in Medan, North Sumatra. Danau Toba is the largest volcanic lake in Indonesia, even in the Southeast Asia. Which make it more special is taken from the Samosir Island, an Island that settled in the middle of the lake. Lake Toba is a crater lake so enormous it has an island almost the size of Singapore in its centre. At over 1,145 square kilometers, and a depth of 450 meters. It formed by a gigantic volcanic eruption some 70,000 years ago. By the eruption of a super volcano (Mount Toba) was estimated to have caused mass death and extinction of several species of living creatures. Lake Toba is actually more like a sea than a lake considering its size. Therefore, the Lake placed as the largest lake in Southeast Asia and the second largest in the world after Lake Victoria in Africa.
