## Getting better

### READING AND USE OF ENGLISH

#### Medical vocabulary

- 1 Put these words into the correct groups: a) people, b) injuries and illnesses, c) treatments.

ache bandage bruise disease fever fracture graze  
infection injection medicine nurse operation pain  
patient plaster porter prescription specialist sprain  
stitches surgeon tablets temperature thermometer  
wound

- 2 Use words from Exercise 1 to say what is happening in each of the pictures. Then talk about the treatment you received when you last had a minor illness or injury. How long did it take you to get better?

- 3 Put these senses in order of importance for you. Then say why you chose that order.

hearing sight smell taste touch

#### Part 5

##### Quick steps to Reading and Use of English Part 5

- Remember that questions 1–5 normally follow the order of information in the text.
- Look at options A–D after you've read what the text says. Otherwise the wrong answers might mislead you.
- You don't need to understand everything in the text to answer the questions, so don't spend a lot of time on words or phrases you don't know.

- 4 Quickly read the text and answer these questions.

- Which of the five senses had Kathy lost?
- Was her operation successful?

- 5 Look at each of questions 2–5 and find the relevant part of the text. Draw a line in pencil with the question number next to it, as in the example for question 1.

#### Exam tips

- Question 6 in Part 5 may test your overall understanding of the text.
  - Look for evidence that your answer is right, and that any references to the other three options are wrong.
- 6 Do the exam task on your own. Find the answer to each question by looking at the part of the text that you have marked.
- 7 Make sure you have answered every question. For any you aren't sure about, cross out the options you know are wrong and then choose from the rest.
- 8 Imagine you had never had one of the other senses: hearing, touch, taste or smell, and then experienced it for the first time. What would you enjoy most?

#### Exam task

You are going to read an extract from a novel. For questions 1–6, choose the answer (A, B, C or D) which you think fits best according to the text.

The operation took place at the hospital in California. Dr Percival, the surgeon, thought it went well, but Kathy would need to rest in bed for three weeks with a bandage over her eyes.

In those weeks Kathy had plenty of time to think about what she had done. There were moments of doubt, almost panic, when she asked herself if she had done the right thing. She thought she had long since put away the foolish hopes for sight she had once held as a girl. Yet here she was, hoping like a girl again. She felt afraid, yes, but also excited at the thought of entering a world that would be totally unfamiliar to her, a world where she could see. It would be like being born a second time.

She wondered what colour would be like. Although it was a word she had often used and heard before, she had never experienced colour. She just could not picture it in her mind, no matter how hard she tried. Kathy gave up trying and waited patiently for the day her bandages would be removed.

The day came. Dr Percival closed all the curtains in Kathy's room so that the light was low. He turned to her and spoke.

'Now, Kathy, we have to take things slowly. Even if things go well, you won't have full eyesight to begin with. First of all, let's see if your eyes are recognising light. We're going to take the bandage off and hold a light in front of your eyes. Are you ready?'

Kathy nodded.

Dr Percival held a small light in front of her eyes as a nurse slowly and carefully removed her bandage. Then Kathy sat up with her eyes still closed. Slowly she opened them and stared at the light. Quickly, she turned her face away.

'Ow! What was that? It felt strange – there's something there, trying to get into my head!'

Dr Percival told the nurse to replace the bandages and then turned to Kathy.

'Kathy,' he said with obvious delight, 'that "something" is light! You've seen light for the first time! Congratulations – you can see!'

Kathy felt confused.

'But ... I thought there would be more to it than this ... I mean ... I mean ... Oh, I don't know what I mean!'

'Don't worry, Kathy,' he said as he smiled. 'All you saw then was pure light. It will take time for your eyes to get used to seeing colours and shapes. Your brain has to do a lot of sorting out of new information that it has never had to deal with before. It's bound to take a little while. The main thing is that you can see!'

'I can see,' said Kathy softly. And underneath her bandages she was crying.

Over the next few weeks Kathy was progressively allowed to use her eyes more often. Soon she could tell dark from light, then she could recognise colours and shapes. But, for a while, she found it very difficult to deal with the huge amounts of extra information that her new sense was giving her every day. It was particularly hard to tell the difference between near and far objects. She would reach out for those across the room as if they were near to her, or she would walk into close objects without realising how close they were.

But Dr Percival was patient. Kathy was taken on walks around the hospital gardens, taken for drives in the car, and shown films and television programmes. Her eyes were gently exercised until they worked well.

'In fact, Kathy,' Dr Percival told her, 'your eyes are better than mine are. I need glasses and you don't!'

What Kathy liked most was seeing the pleasing effects shapes and colours produced. She would see ordinary things as objects of great beauty – the black and white squares on a chess board, the shape of a hand, the colours of a flower. Sounds, for the first time in her life, took second place. Colours and shapes now filled her mind with pleasure beyond her powers to describe.

- 1 How did Kathy feel during the three weeks after her operation?
  - A She had the impression she had been born again.
  - B She was looking forward to new experiences.
  - C She wished that she had not had the operation.
  - D She was glad that she was still a young girl.

  - A She changed her position in bed.
  - B She told the doctor she wasn't ready.
  - C She looked at the light from the windows.
  - D She immediately opened her eyes.
- 3 What was Kathy's first reaction to seeing the light?
  - A She felt it was much as she had expected.
  - B She was disappointed it went out so quickly.
  - C She found it an uncomfortable experience.
  - D She was delighted she could see so much.
- 4 What was Kathy's biggest problem once she could see?
  - A She could not understand everything the doctor told her.
  - B She found it difficult to judge the distance of things.
  - C She quickly became tired as a result of looking at everything.
  - D She was unable to distinguish between certain colours.
- 5 To help improve her eyesight,
  - A the hospital staff filmed Kathy's progress.
  - B Kathy had a second, smaller, operation.
  - C Kathy went outside with the hospital staff.
  - D the nurse put lighter bandages over Kathy's eyes.
- 6 How did Kathy's life change during the extract?
  - A She felt that she was gradually becoming much more confident as a person.
  - B She began to enjoy what she had previously not even been able to imagine.
  - C She found that seeing and hearing were now equally important to her.
  - D She came to realise that there would always be limits to what she could see.

### Part 2 letter **W** Page 90

- 1 What kind of text have you received?
- 2 Who wrote it and what are they planning to do?
- 3 What do they want you to do?
- 4 Do they mainly use formal or informal language? Give examples.

### Exam task

You have received a letter from an Irish penfriend, Linda. Read this part of the letter and then write your letter to Linda.

I'm really looking forward to spending my summer holidays in your country – and to seeing you! As you know, I always try to keep quite fit. So can you give me some tips on the sports I could do in your town while I'm there? Write back soon,  
Linda

Write your letter in 140–190 words. Do not write any addresses.

### Exam tip

The style of language in the text you have received can help you decide how formal or informal your reply should be.

#### Quick steps to writing a Part 2 letter

- Put the opening (e.g. *Dear Jenny*), the closing (e.g. *Best regards*) and your own name on separate lines.
- Don't use the same expression too often. For example, instead of repeating *please tell me*, say *I'd like to know* or *can you let me know*.

4 Read Sam's letter and answer the questions.

- 1 Which paragraph deals with: a) indoor sports, b) sports they can do together, c) outdoor sports?
- 2 What examples can you find of: a) informal language, b) relative clauses, c) purpose links?

Hi Linda,

Thanks very much for your last letter. I'm fine, and I'm glad to hear you're well, too.

I'm sure you'll have a great time here. There are lots of sports you can do in the countryside, such as hill-walking or mountain-biking, as well as water sports like rowing and sailing on the lake. It will be too cold for swimming, though.

If you'd rather go to a sports centre there's a really good one which has facilities for things like squash and basketball, and an Olympic-size pool where they play water-polo. Now that really is good exercise: I tried it once and I was exhausted after about ten minutes!

Actually, it'd be nice if we could both do the same sports so that we have more time together. I sometimes go ice skating – would you like to try that? Or how about playing tennis? If so, I'll need to book ahead to make sure we get a court.

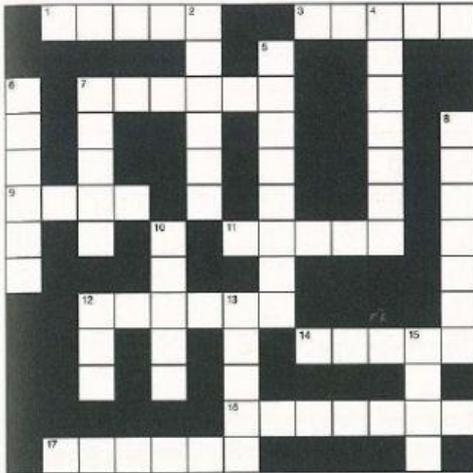

Anyway, let me know what you'd like to do and I'll make some arrangements.

Bye for now.

Sam
