

# EARTH'S SURFACE

## Lesson 1 How does Earth's surface change?

Watch the slides sent in Teams – Class Material and Slides to help you solve this worksheet.

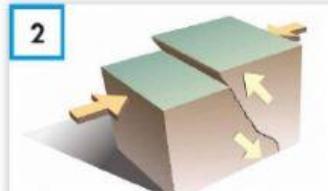

### Lesson 1 · How does Earth's surface change?

1 Earth's surface is constantly changing. Read and write.

plates      fault      sliding plate boundary      spreading plate boundary  
lithosphere      converging plate boundary

- 1 The lithosphere is the solid, rocky outer-most layer of Earth.
- 2 Sections of the solid, rocky outermost layer of Earth are called \_\_\_\_\_.
- 3 A \_\_\_\_\_ occurs when two plates push into each other.
- 4 A \_\_\_\_\_ occurs when plates move apart from each other.
- 5 A \_\_\_\_\_ occurs when two plates move past each other in opposite directions.
- 6 A \_\_\_\_\_ is a crack in the land where two plates meet.

2 Match the pictures and the words from 1. Write.

spreading plate boundary \_\_\_\_\_

Lithosphere

Converging plate boundary

Fault

Sliding plate boundary

Plates
