To all the friends I've loved before

Lana Condor and Noah Centineo are inseparable. They make us think they have known each other forever but, in fact, they only met just before auditioning for the trendy 2018 film *To All the Boys I've Loved Before*!

They became friends behind the scenes. After they started working together, they both realised how caring the other one was. Besides this, they share many other things in common.

Although they have only known each other for a short time, their connection is really strong.

Noah has mentioned many times that their friendship is so strong because their perspectives on life are alike. **Both** Lana **and** Noah have previously admitted to being romantics. They have also been able to maintain their friendship because they believe in communication.

These sweet twenty-somethings have never spoken badly of one another. Lana has been extremely supportive of Noah's work. She believes her co-star will become a huge star someday because people love him. Similarly, the young actor has worshipped Lana's dramatic as well as comedic talent for a long time.

Their chemistry is powerful because they treasure having the other one around. **Although** they share a special and unique bond, they are both dating other people. They make each other feel younger and stronger when they are together. **Both** Lana **and** Noah believe they are siblings.
