

Date: Today is _____, August _____.

Name: _____ Class: 6th _____

UNIT 2 LESSON 4: PLANTS

A. Read. Then, find and select the words from the box.

stem
root
seed
oxygen
size
underground

B. Read carefully. Then, answer.

The Corn Plant

Skills Tip

Use headings to find information.

People eat corn in many countries. They also feed corn to animals, like cows and chickens. The corn plant has many parts.

Stem

The corn plant has a strong stem that helps the plant to stand up. Most corn plants grow from one to three meters tall.

Leaves

The corn plant usually has twenty or more leaves. The leaves make food for the plant.

Roots

The roots of the corn plant can grow about two meters long underground. The roots take in food and water for the plant.

Seeds

Each corn plant makes one or two ears. The ears have hundreds of seeds, which grow and become new plants. There can be eight hundred seeds on one ear.

1. How many leaves does the corn plant have?

The corn plant usually _____.

2. How long can the roots of a corn plant grow?

The roots _____
_____ underground.

3. How many seeds can there be on one ear of corn?

There can be _____.

C. Read and select True or False.

- | | | |
|--|------|-------|
| 1. People feed corn to cows and chickens. | True | False |
| 2. The roots of a corn plant can grow underground. | True | False |
| 3. The roots help the plant to stand. | True | False |
| 4. Each corn plant has one or two seeds. | True | False |

D. Look at the picture and read. Then, write.

stem leaves roots seeds

1. Which parts of the plants are these? What do they do?

Those are the leaves. The leaves make food _____.

2. Which parts of the plants are these? What do they do?

Those are _____. The seeds grow _____.

3. Which part of the plant is this? What does it do?

This is _____. The stem helps _____.

4. Which parts of the plants are these? What do they do?

Those _____. The roots take _____

_____.
