

PENTAKSIRAN PBD

BAB 9 : KIMIA INDUSTRI

9.3 : Polimer

NAMA : _____

KELAS : _____

S.P: 9.3.1 – 9.3.4

1 Rajah berikut menunjukkan sejenis barangan yang diperbuat daripada polimer.

The following diagram shows a type of item made of polymer.

(a) Berikan definisi polimer. **TP1**

Give the definition of polymer.

(b) Berikan **dua** contoh polimer semula jadi dan polimer sintetik. **TP2**

*Give **two** examples of natural polymer and synthetic polymer.*

(i) Polimer semula jadi/ *Natural polymer*

1	
2	

(ii) Polimer sintetik/ *Synthetic polymer*

1	
2	

(c) Nyatakan perbezaan antara polimer semula jadi dengan polimer sintetik. **TP4**

State the difference between natural polymers and synthetic polymers.

- 2 (a) Lengkapkan jadual di bawah. **TP3**
Complete the table below.

Jenis polimer Type of polymer		Monomer Monomer
Polimer semula jadi <i>Natural polymer</i>	Getah <i>Rubber</i>	(i)
	Selulosa <i>Cellulose</i>	(ii)
	(iii)	Glukosa <i>Glucose</i>
	(iv)	Asid amino <i>Amino acid</i>
Polimer sintetik <i>Synthetic polymer</i>	(v)	Etena <i>Ethene</i>
	Polipropilena <i>Polypropylene</i>	(vi)
	Polistirena <i>Polystyrene</i>	(vii)

- (b) Rajah berikut menunjukkan dua jenis proses.
The following diagram shows two processes.

Namakan proses Y dan Z. **TP2**
Name processes Y and Z.
