

Using the Internet for collecting Information and Communication

Grade 06

The internet is made up of a large number of computers and computer networks around the world. There are a wide range of services available on the internet reading such as reading newspapers, bill payments, online shopping, exchange of letters and watching television.

Web Browsers

The software used to open websites and webpages on the internet is the web browser.

Google Chrome

Mozilla Firefox

Edge

Opera Mini

Internet Explore

Safari

Use of Web Browsers

To use a web browser, the computer should be connected to the internet.

Normally a web browser can be opened via a shortcut on the desktop.

The address bar can be seen on the top of the web browser's interface.

If you want to open a website, you need to enter an address in the address bar.

Bring the cursor on to the address bar and click on it. Then enter the address directly. Then press the enter key.
