

Matematik Tahun 3
Pecahan

Nama : _____

Tarikh : _____

Tuliskan *pecahan setara* bagi setiap pecahan wajar di bawah.

(GUNAKAN SIFIR 2)

contoh

$$\frac{1}{3} = \frac{2}{6}$$

(Note: In the original image, the fraction 1/3 is circled with a dashed line, and 'x 2' is written next to it. Similarly, the fraction 2/6 is circled with a dashed line, and 'x 2' is written next to it. This indicates that both the numerator and denominator of 1/3 are multiplied by 2 to get 2/6.)

1) $\frac{1}{5} = \frac{\square}{\square}$

(Note: In the original image, the fraction 1/5 is circled with a dashed line, and 'x 2' is written next to it. Similarly, the fraction box is circled with a dashed line, and 'x 2' is written next to it.)

2) $\frac{1}{7} = \frac{\square}{\square}$

(Note: In the original image, the fraction 1/7 is circled with a dashed line, and 'x 2' is written next to it. Similarly, the fraction box is circled with a dashed line, and 'x 2' is written next to it.)

3) $\frac{2}{3} = \frac{\square}{\square}$

(Note: In the original image, the fraction 2/3 is circled with a dashed line, and 'x 2' is written next to it. Similarly, the fraction box is circled with a dashed line, and 'x 2' is written next to it.)

4) $\frac{2}{5} = \frac{\square}{\square}$

5) $\frac{3}{4} = \frac{\square}{\square}$

6) $\frac{3}{5} = \frac{\square}{\square}$

7) $\frac{1}{4} = \frac{\square}{\square}$
