

Algebra 1

2.1 - 2.4 practice worksheet

1) $2x + 19 = 45$	2) $9x + 25 = 88$
3) $3x + 36 = 96$	4) $8x + 24 = 56$
5) $4m - 4 = 4m$	6) $p - 1 = 5p + 3p - 8$
7) $5p - 14 = 8p + 4$	8) $p - 4 = -9 + p$

$$9) -8 = -(x + 4)$$

$$10) 12 = -4(-6x - 3)$$

$$11) -18 - 6k = 6(1 + 3k)$$

$$12) 5n + 34 = -2(1 - 7n)$$

$$13) (x + 4) - 4 = 2(x + 4) + x$$

$$14) 3n - 5 = -8(6 + 5n)$$
