11.	Which car stops passengers getting bored?	A	B	C
12.	Which car is used for sports events?	A	B	C
13.	Which car is the cheapest to buy?	A	B	C

Three Cars

Ruscon, family car

Ruscon has a big engine and this makes it possible to go on long trips. The car has eight seats which includes the driver's seat. There is plenty of room in the back for luggage. The seats in the back have DVD players so the children can watch films during the journey. Each seat has its own screen. This car is very cheap to run but can be a little bit expensive to buy. If you want to buy the car, the bank can lend you the money.

McLauren, sports car

McLauren is very small and can travel very fast. There is only room for two people, the driver and one passenger. There is only room for one small bag in the back of the car. You have to be rich to run this car as it uses a lot of petrol. This car is often used for racing other fast cars. It is very expensive to buy, and banks will not lend you any money to buy it.

Nican, city car

Nican is nice and very small. There are two seats in the front and none in the back. There is no room in the back for luggage but you can put two or three shopping bags behind the front seats. You don't have to spend a lot to buy this car and it's also very cheap to run. The only problem is that it is slow because it has an electric engine. It is only good for short journeys because of the battery. Car parks in the city centre are free for electric cars.
