

### Preventing Fires

Please fill in the blank spaces with the proper word(s).

1. Know where fire \_\_\_\_\_ are located and how to use them.
2. Use the right kind of fire extinguisher. There are \_\_\_\_\_ classes of fires, and fire extinguishers should be labeled according to the kind of fire for which they can be used.
3. Class \_\_\_\_ fires: wood, paper, \_\_\_\_\_, ordinary combustibles.
4. Class \_\_\_\_ fires: \_\_\_\_\_ liquids, such as \_\_\_\_\_, oil, gasoline, solvents
5. Class \_\_\_\_ fires: \_\_\_\_\_, motors, electrical equipment, and so forth
6. Never use \_\_\_\_\_ or a Class A fire extinguisher on a \_\_\_\_\_ fire or \_\_\_\_\_ fire. You will only spread the fire.
7. Keep a supply of \_\_\_\_\_ or \_\_\_\_\_ soda handy to put out fires on rangetops.
8. \_\_\_\_\_ only in designated areas. Do not leave \_\_\_\_\_ cigarettes unattended.
9. Keep exits free from \_\_\_\_\_.
10. Establish and post a plan for \_\_\_\_\_ evacuation, clearly identifying routes and exits. The plan should include \_\_\_\_\_ for evacuating customers and other non-employees.
