

Portrait of Napoleon

Watch the video tutorials on how to draw Napoleon and follow the next steps:

- **First:** look at the steps in the videos and pay attention to the details, but do not draw yet.

- **Second:** watch the videos again and try to draw the portraits.

You can use your miniboard or a paper and a pencil/marker to create a draft. Repeat a few times until you find your personal style.

- **Third:** choose one of the models and the drawing tools to create your final portrait. You can do it either with some digital program in your computer or tablet or with traditional drawing stuff.

- **Finally:** take a picture or scaner image of your Napoleon´s Portrait and send it to your teacher.

- IMPORTANT: **Although you are a great artist, in this task you must not sign the work of art.** HAVE FUN!
