

Seasons

In the back of the book *Dry to Dry* there is a list of the seasons of Kakadu and their approximate dates according to the Gregorian calendar. On the CSIRO website there are 7 different indigenous weather charts. These vary greatly from the more common 4 seasons (Summer, Autumn, Winter and Spring) as they include 6 or 7 seasons based on the weather and temperature rather than dates. Choose one of the Indigenous charts found at <https://www.csiro.au/en/research/natural-environment/land/about-the-calendars> and plot it against the regular Gregorian calendar below.

January

February

March

April

May

June

July

August

September

October

November

December

Mathematics: ACMMG040 - Name and order months and seasons.
