

Multiplying and Dividing Numbers by 10, 100 and 1000

Math challenge

Write missing numbers in the calculation.

a $630 \times \dots = 6300$

b $4600 \div \dots = 460$

c $230 \div \dots = 23$

d $\dots \times 100 = 2100$

Write the missing numbers in these chains.

a $4.5 \div 10 \rightarrow \dots \div 10 \rightarrow \dots \times 100 \rightarrow \dots$

b $2.06 \times 10 \rightarrow \dots \div 100 \rightarrow \dots \times 10 \rightarrow \dots$

c $0.33 \div 10 \rightarrow \dots \times 100 \rightarrow \dots \div 10 \rightarrow \dots$

d $1.62 \times 100 \rightarrow \dots \div 10 \rightarrow \dots \div 100 \rightarrow \dots$

e $4567 \div 10 \rightarrow \dots \div 10 \rightarrow \dots \times 100 \rightarrow \dots$

f $9876 \div 100 \rightarrow \dots \times 10 \rightarrow \dots \times 100 \rightarrow \dots$
