

PLANTS

TREE

Trees have one thick, hard stem called a trunk. They are the tallest plants and have high branches.

BUSH

Bushes have a thick, hard stem with low branches.

GRASS

Grasses have a soft stem. They are thin and flexible and usually short.

① What is this? Tree, bush or grass? Choose.

② Trees can be deciduous or evergreen.

- Deciduous trees lose all their leaves in autumn.
- Evergreen trees produce leaves all year round.

Give two examples of each one.

Deciduous trees

oak tree

Evergreen trees

pine tree

③ The Irati Forest is the second largest forest in Europe.

What is the type of tree we can find in the Irati Forest?

Is it deciduous or evergreen?
