

## 练习 1

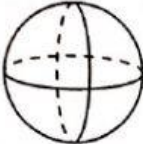

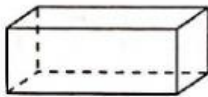

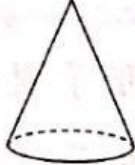

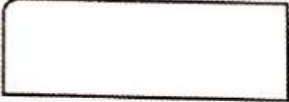

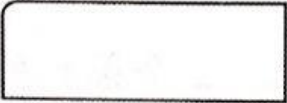

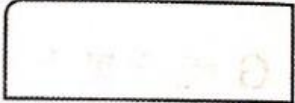

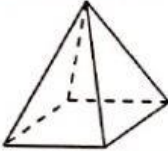

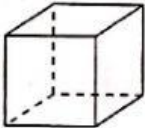

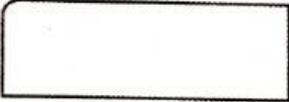

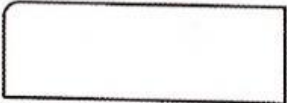

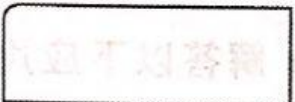

## 立体

## BENTUK 3D

**A** 写出以下立体的名称。 *Namakan bentuk 3D di bawah*

7.1.1 TPI 说出立体图形和平面图形的名称

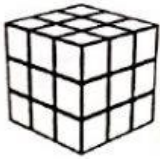

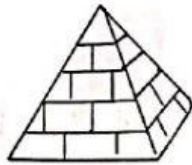

掌握 ( ) 尚未掌握 ( )

|                                                                                      |                                                                                      |                                                                                        |
|--------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|
| 1   | 2   | 3   |
|     |     |     |
| 4  | 5  | 6  |
|   |   |   |

**B** 画线连一连。 *Sambungkan nama bentuk 3D yang betul.*

7.1.1 TPI 说出立体图形和平面图形的名称

掌握 ( ) 尚未掌握 ( )

|                                                                                       |       |                                                                                         |
|---------------------------------------------------------------------------------------|-------|-----------------------------------------------------------------------------------------|
| 1  | 圆柱体   | 2  |
| 3  | 长方体   | 4  |
| 5  | 圆锥体   | 6  |
|                                                                                       | 正方棱锥体 |                                                                                         |
|                                                                                       | 正方体   |                                                                                         |
|                                                                                       | 球体    |                                                                                         |
