

Reading Passage:

A skilled reader will read a lot of words in each block. He or she will only look at each block for an instant and will then move on. Only rarely will the reader's eyes skip back to a previous block of words. This reduces the amount of work that the reader's eyes have to do. It also increases the volume of information that can be processed over a given period of time. On the other hand, a slow reader will spend a lot of time reading small blocks of words. He or she will often go back, losing the flow and structure of the text, and muddling their overall understanding of the subject. This irregular eye movement quickly makes the reader tired. Poor readers tend to dislike reading because they feel it is difficult concentrate and comprehend to written information.

Complete the table below.

Choose **NO MORE THAN TWO WORDS** from the passage for each answer.

Type of reader	Reading method	Effect of method on reader
Skilled reader	- many (1) in a block - reader hardly ever goes back	- reader's (2) do less work - more (3) is processed
(4).....	- Small blocks - Reader (5)..... goes back	- Reader easily gets (6)..... - Finds it hard to (7)..... on passage
