

7. Escribe los factores que completan cada multiplicación.

$3 \times \square = 15$

$\square \times 7 = 21$

$\square \times \square = 24$

$2 \times \square = 18$

$\square \times 6 = 12$

$\square \times \square = 20$

$3 \times \square = 12$

$\square \times 3 = 9$

$\square \times \square = 27$

8. Resuelve aplicando la propiedad:

Asociativa

$$(4 \times 3) \times 2 = \square \times (\square \times \square)$$
$$\square \times \square = \square \times \square$$
$$\square = \square$$

Conmutativa

$$3 \times 9 = \square \times \square$$
$$\square = \square$$

9. Resuelve las multiplicaciones.

$3 \times 0 = \square$

$3 \times 1 = \square$

$3 \times 3 = \square$

$3 \times 4 = \square$

$3 \times 5 = \square$

$3 \times 6 = \square$

$3 \times 7 = \square$

$3 \times 8 = \square$

$3 \times 9 = \square$

$3 \times 10 = \square$

$3 \times 11 = \square$

$3 \times 12 = \square$

$2 \times 1 = \square$

$2 \times 2 = \square$

$2 \times 3 = \square$

$2 \times 4 = \square$

$2 \times 5 = \square$

$2 \times 6 = \square$

$2 \times 7 = \square$

$2 \times 8 = \square$

$2 \times 9 = \square$

$2 \times 10 = \square$

$2 \times 11 = \square$

$2 \times 12 = \square$
