EXERCISE CHAPTER 9 (HEAT FLOW AND THERMAL EQUILIBRIUM) PART A

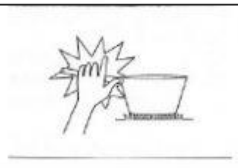

1. Match the following statement to its correct way of heat transfer.

Conduction	**Heat is transferred in a form of waves through vacuum**
Convection	**Heat is transferred to other particles through vibration**
Radiation	**Heat is transferred by movement of hot particles upwards**

2. Complete the following table using the words given. Drag and drop the correct answer.

Radiation **Fluid** **Solid**

Vacuum **Convection** **Conduction**
