Resuelva los siguientes ejercicios sobre las razones trigonométricas inversas:

1.

$sen\ \theta = \frac{1}{2}$

$csc\ \theta = \frac{2}{1} =$

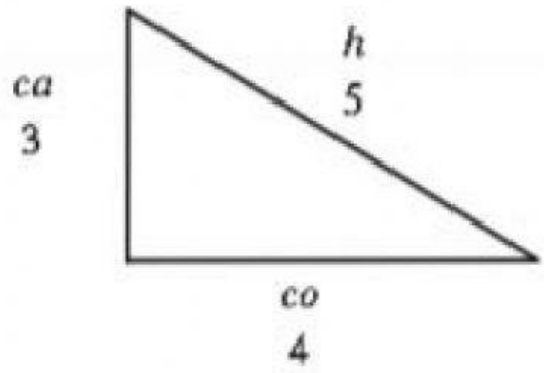

$coc\ \theta = \frac{\sqrt{3}}{25}$

$sec\ \theta = \frac{2}{\sqrt{3}} * \frac{\sqrt{3}}{\sqrt{3}} = \sqrt{\ }$

$tan\ \theta = \frac{1}{\sqrt{3}}$

$ctan\ \theta = \frac{\sqrt{3}}{1} = \sqrt{\ }$

2.

$sen\ \theta = \frac{4}{5}$

$csc\ \theta = \frac{5}{4} =$

$coc\ \theta = \frac{3}{5}$

$sec\ \theta = \frac{5}{3} =$

$tan\ \theta = \frac{4}{3}$

$ctan\ \theta = \frac{3}{4} =$
