

Name _____

_____ Week 4-Monday Big 4

1. The Commutative Property means that the order of the numbers being added together does not change the outcome.

$$4 + 2 = \underline{\quad} + 4$$

$$5 + 3 + 6 = 5 + 6 + \underline{\quad}$$

$$36 + 54 = 54 + \underline{\quad}$$

2. Round the following numbers to the nearest 10 and 100

	10	100
52		
821		
5,494		

3. Solve for the missing addend.

$$\underline{\quad} + 64 = 80$$

$$36 + \underline{\quad} = 70$$

$$452 + \underline{\quad} = 500$$

4. You can group addends different ways, and the sum will not change. Addends are grouped with parenthesis. (You add the part in parenthesis first.)

$$(9 + 5) + 1 = 9 + (\underline{\quad} + 1)$$

$$7 + (6 + 5) = (\underline{\quad} + 6) + 5$$

$$(3 + 8) + 35 = 3 + (\underline{\quad} + 35)$$
