Part 2 Error Correction

Read the text below and correct the underlined errors. For each question, write the correct word in the space provided below.

Please Wait

Today was the first day of school, and my friend Jody **(1)has** a new haircut. It looked so cool. When I got home, I asked my mom **(2)of** a haircut, and I told her **(3)exact** how I wanted it. I asked her, very politely, "Could you please do it today?" Sadly, she was busy. She told me that it takes a long time to cut hair. "First, you have to take a bath so that your hair is wet. **(4)Than,** you have to brush it out really well," she said. My face dropped as my mom continued. "Finally, when you cut, you have to use special scissors, and cut very gently so that everything is even..." **(5)She** voice trailed off.

"You need to be very careful and get it just right. If you **(6)made** a mistake, you can't glue the hair back **(7)in,**" she said, laughing. I didn't think it was very funny. "Maybe I can cut it for you on the weekend," she told me. I went back to my room and looked at my hair in the mirror. It was way too long, and I didn't want to go back to school **(8)look** like this.

Part 2 Error Correction

Read the text below and correct the underlined errors. For each question, write the correct word in the space provided below.

Colours

Imagine a world without colours. If you see only shades of grey (1)at you, wouldn't you find it dull and boring? Would it make you feel gloomy and that everything is ugly and uninteresting? I am quite certain you would say yes to all these questions. We humans love colours. We love colours (2)since colours make our world beautiful. All things on earth have their own colours and hues. Even things of the same type (3)must have many shades and colours. Flowers, for example, come in many colours. Roses come in a variety of colours such as white, yellow, red, pink, orange and even blue. The sky changes in colour (4)depend on the time and the season. The contrast between the colours of things makes the world more visually interesting. Man (5)learn from nature, and so the things that man make come in a variety of colours too. For example, mobile phones today come (6)as a selection of coloured covers so that users can choose the colour (7)their like best. They can also change the colour of (8)an phone whenever they wish.
