

[November/December 2006]

- 5 A metal disc is swinging freely between the poles of an electromagnet, as shown in Fig. 5.1.

Fig. 5.1

When the electromagnet is switched on, the disc comes to rest after a few oscillations.

- (a) (i) State Faraday's law of electromagnetic induction and use the law to explain why an e.m.f. is induced in the disc.

.....

.....

.....

..... [2]

- (ii) Explain why eddy currents are induced in the metal disc.

.....

.....

..... [2]

- (b) Use energy principles to explain why the disc comes to rest after a few oscillations.
