1. Select the correct equation of momentum

$$\vec{p} = m\vec{v}$$

$$\vec{J} = \Delta\vec{p}$$

$$\vec{J} = \vec{F}\Delta t$$

2. Select the equations for that can be used to calculate Impulse

$$\vec{p} = m\vec{v}$$

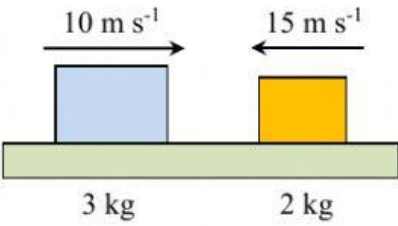

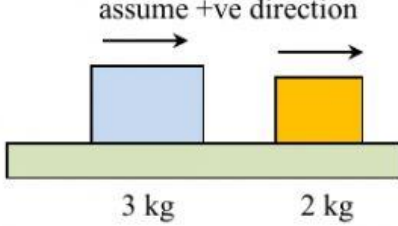

$$\vec{J} = \Delta\vec{p}$$

$$\vec{J} = \vec{F}\Delta t$$

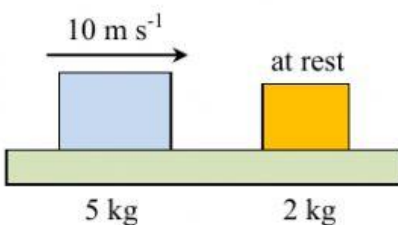

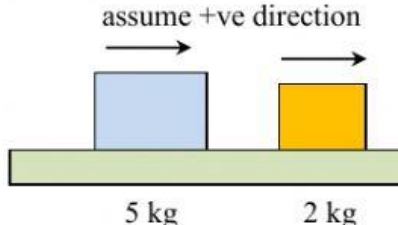

3. Complete the following table by ticking YES or NO.

Type of collision	Total of momentum is conserved.	Total of kinetic energy is conserved.	Total of energy is conserved.
