

1 What's Sue's favourite animal? Listen and read. 

My favourite animal

Giraffes live in Africa. They're very tall. They have got black and brown spots on a yellow body. Giraffes have got very long necks and long legs. Their front legs are longer than their back legs.

Giraffes eat leaves from trees. They don't need to drink much water, because they get water from the leaves.

Lions chase giraffes, but giraffes have got strong legs, and they can kick lions away!

I like giraffes because they are very pretty.

2 Read again and complete Sue's plan.
