GREEN WEEK

MY PET i

1. Read Andrea's report about hamsters. Then complete the chart below.

Hamsters

Hamsters are small animals. Many children in Europe and the USA have got them as pets. Syrian hamsters are 13 to 18 centimetres long and they usually live in cages. They live for two or three years. Hamsters sleep in the morning and in the afternoon. They get up at night – just in time for dinner. Syrian hamsters eat vegetables and fruit and they drink water. They love exercise. Many people put wheels in their hamster's cage. The hamsters run on the wheels at night.

2. Complete this chart about a pet with the information given below.

Type if animal	A special type of pig (1/5 of a normal pig)
size	30-40 cm long
Weight	Babies: about 250gr. In 2 years:15-25 kg.
Live in	Homes (however, pigs usually live on farms)
Other information	No sport but they need exercise (have walks with them). Intelligent, friendly, quiet, clean. They love people and love attention.

LIVEWORKSHEETS

3. What pet do you have? Tick it in this list
