

QN 25.

If the area of $\triangle ABE = 84 \text{ cm}^2$, calculate the following.

(a) Ar. $\square$ ABCD. cm^2

(b) Length of BC. cm

QN 26.

In the figure, PQRS is a square and $SN \perp RM$. If $RM = 12.5 \text{ cm}$ and $SM = 4 \text{ cm}$ calculate the length of QS

cm
