

Sultan and Mariam are learning about how computer memory works.

Help them to complete the activity below by putting the steps in the correct order.

The first one has been done for you.

S T R E A M

The excel document gets sent to the CPU.

The CPU sends the excel document to the RAM/ROM.

The excel document loads from the HDD.

Data that's being used is available for quick access from the primary memory.

1 Computer is switched on and an excel document is opened.
