Comprehension

*** Read the passage. Then, answer the questions.**

Plastic waste that ends up in oceans and landfills can take hundreds of years to degrade. It also releases toxins into the environment, which are harmful to us. Thus, we should reduce plastic waste. There are a few ways we can do so.

Firstly, stop using plastic straws. If you need to use a straw, get yourself a stainless steel straw.

Secondly, bring your own reusable bag when you go shopping.

Besides that, always carry your own water bottle and stop buying bottled water. You can also bring your own container when buying food from restaurants.

By doing this, you not only reduce plastic waste but you also save money.

1) How long does plastic waste take to degrade?

2) What should you do if you need to use a straw?

3) What can you do to reduce plastic waste when you go shopping?

4) What other way can we reduce plastic waste?
