

EARTH'S FOUR SPHERES

Directions: Label the four spheres of the Earth. Click on the down arrow to select the correct answer.

Directions: Match the term to its definition.

Geosphere

Often referred to as air, this sphere is the layer of gas that surrounds the Earth.

Biosphere

This sphere is the total amount of water on a planet.

Atmosphere

This sphere is all the rock, soil and sediments that make up Earth's land.

Hydrosphere

This sphere is all parts of and around the planet Earth where life can be found.
