

1. Give your answers in hours.

(a) $180 \text{ min} = \underline{\hspace{2cm}} \text{ h}$

(b) $360 \text{ min} = \underline{\hspace{2cm}} \text{ h}$

(c) $120 \text{ min} = \underline{\hspace{2cm}} \text{ h}$

(d) $240 \text{ min} = \underline{\hspace{2cm}} \text{ h}$

(e) $480 \text{ min} = \underline{\hspace{2cm}} \text{ h}$

(f) $300 \text{ min} = \underline{\hspace{2cm}} \text{ h}$

2. Give your answers in hours and minutes.

(a) $70 \text{ min} = \underline{\hspace{2cm}} \text{ h } \underline{\hspace{2cm}} \text{ min}$

$60 \text{ min} = 1 \text{ h}$
 $70 \text{ min} - 60 \text{ min} = 10 \text{ min}$
So, $70 \text{ min} = 1 \text{ h } 10 \text{ min}.$

(b) $195 \text{ min} = \underline{\hspace{2cm}} \text{ h } \underline{\hspace{2cm}} \text{ min}$

(c) $430 \text{ min} = \underline{\hspace{2cm}} \text{ h } \underline{\hspace{2cm}} \text{ min}$

(d) $280 \text{ min} = \underline{\hspace{2cm}} \text{ h } \underline{\hspace{2cm}} \text{ min}$

(e) $365 \text{ min} = \underline{\hspace{2cm}} \text{ h } \underline{\hspace{2cm}} \text{ min}$
