AZ Vocabulary

1. You can draw a **bar diagram** to model and solve a problem.

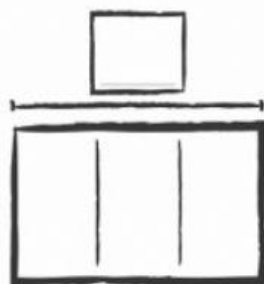

There are 3 plates.

There are 5 oranges on each plate.

How many oranges are there in all?

Draw circles for the
oranges on each plate.

The equation $5 + 5 + 5 = \underline{\quad}$
also models the problem.

There are oranges in all.

2. Complete the bar diagram to solve each problem.

Then write an equation.

There are 8 spoons in each drawer.

There are 2 drawers.
