G3 Collins U2 Vocabulary

Part 1: Rain forest layer reading

Rain forest has four layer: emergent layer, canopy, understory and forest floor.

Emergent is like the top where trees can enjoy the light the most. But they have to suffer from high temperature and strong winds.

Canopy is the second layer which is like the roof of branches and trees. It is 60 to 90 feet above the ground.

Understory contains young and small trees.

Forest floor is a dark and damp place which is covered with rotting leaves.

Part 2: Unscramble the sentences

1 the understory, forest layer, four layer: layer, rain canopy emergent has forest floor
