The value of digits

Face value is what you see when you look at the digit.

Place value is the name of the column in which the digit is placed.

Numerical Value is how much the digit is worth.

Use the information provided to complete the tables below.

In the number 23, 698

Digit	Face Value	Place Value	Numerical Value
2	2		
6			600
8		ones	
9	9		
3			3000

Expanding Numbers

To expand a number means to **stretch** the number out. Each digit is represented by its numerical value.

Example: 8549 =   8 thousand + 5 hundred + 4 tens + 9 ones

=   (8 x 1000) + (5 x 100) + (4 x 10) + (9 x 1)

=   8000 + 500 + 40 + 9

Expand these two numbers

❖ 5289 = _____ thousand + _____ hundred + _____ tens + 9 ones

= (5 x 1000) + (2 x _____) + (8 x _____) + (9 x _____)

=   _____ +   200   +   _____   +   _____

❖ 6442 = _____ thousand + 4 hundred + _____ tens + _____ ones

      = (6 x _____) + (4 x _____) + (4 x 10) + (2 x _____)

      =   6000 + _____ + _____ + _____

❖ 41, 073 =

    _____ ten thousand + 1 thousand + _____ hundred + 7 tens + _____ ones

      = (4 x _____) + (1 x _____) + (0 x 100) + (7 x _____) + (3 x 1)

      = _____ + _____ + _____ + _____ + 3
