

CELLS

- 1 Animal and plant cells have similarities and differences. Label each name into the correct place.

- 2 Each part of the cells perform a function. Join each part with the correct function.

Nucleus	Protect the cell and give the cell its shape.
Cell membrane	Contain water and minerals and storage information.
Cytoplasm	Contain all the components of the cell.
Vacuoles	Contain the chlorophyll to make the photosynthesis.
Cell wall	Control all the functions of the cell.
Chloroplasts	Control the exchange of substances.
