

Finding the cube roots

Example: $\sqrt[3]{8} =$ Cubed root of 8 = 2 because $2 \times 2 \times 2$ is equal to 8
= 8 because 2 \times 2 \times 2 = 8

1. $\sqrt[3]{1} =$ _____ because it is _____ \times _____ \times _____ = _____

2. $\sqrt[3]{1000} =$ _____ because it is _____ \times _____ \times _____ = _____

3. $\sqrt[3]{27} =$ _____ because it is _____ \times _____ \times _____ = _____

4. $\sqrt[3]{0} =$ _____ because it is _____ \times _____ \times _____ = _____

5. $\sqrt[3]{125} =$ _____ because it is _____ \times _____ \times _____ = _____

6. $\sqrt[3]{64} =$ _____ because it is _____ \times _____ \times _____ = _____

7. $\sqrt[3]{8} =$ _____ because it is _____ \times _____ \times _____ = _____
