

Name:

Classifying Chemical Elements

Using a periodic table, classify according to their family (metals, metalloids, nonmetals):

1. Vanadium –
2. Barium –I
3. Californium –
4. Polonium -
5. Sulfur -
6. Selenium -
7. Fluorine -
8. Germanium -
9. Lead –
10. Thulium
11. Krypton
12. Boron
13. Antimony
14. Rubidium
15. Hafnium
16. Arsenic
17. Phosphorus
18. Astatine
