Activity 3: Do it yourself!

LEAD IN:

Put Julissa's email in the correct order.

As for me, I use this invention to go to different places. Generally, I use it on weekends. It is very useful and it's inexpensive. Can you guess what it is? ... Yes! My favourite invention is my bike.

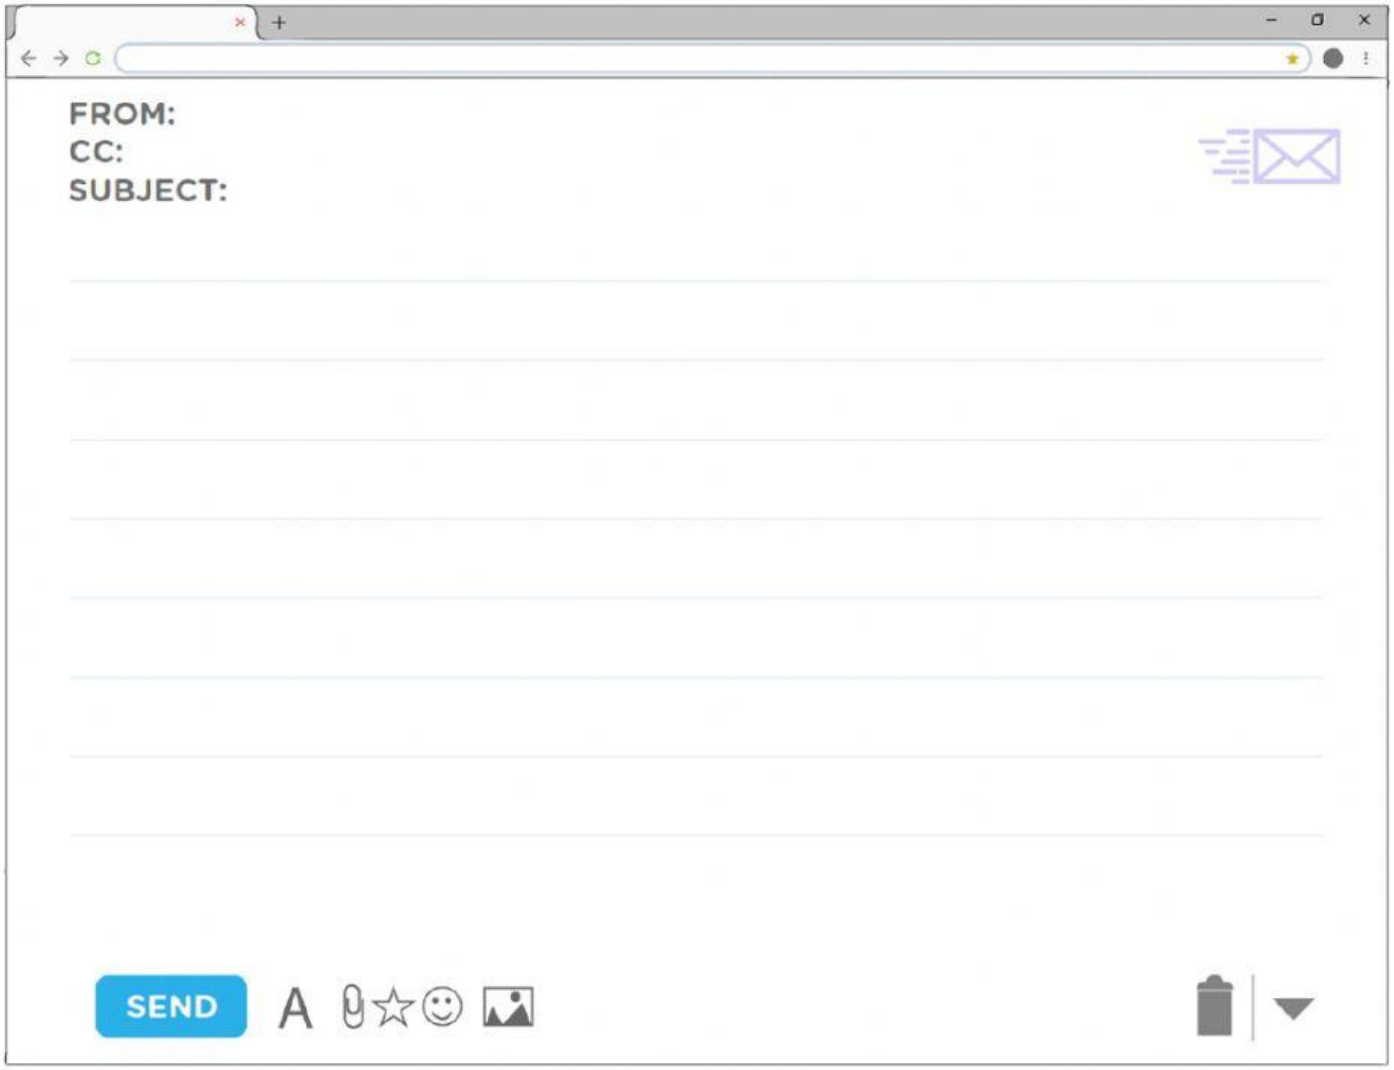

Hope to hear from you soon.

Best wishes
Julissa

How are you? I was happy to read your email. So, your favourite invention is the smartphone. Let me tell you about the inventions my brother and I use in our everyday life.

Dear Alicia,

My brother's favourite invention is his smartphone. He talks with his friends, takes photos and makes videos with it. He uses his smartphone every day. His smartphone is new and very expensive.
