

How to save our planet

1) Match the words with their meanings.

GLOBAL WARMING

the air, water, and land in or on which people, animals, and plants live:

NATURAL RESOURCES

a gradual increase in world temperatures caused by gases such as carbon dioxide that are collecting in the air around the earth and stopping heat escaping into space

BIODIVERSITY

such as gas, coal, and oil, that were formed underground from plant and animal remains millions of years ago

DEFORESTATION

the cutting down of trees in a large area, or the destruction of forests by people.

FOSSIL FUELS

the number and types of plants and animals that exist in a particular area or in the world generally, or the problem of protecting this:

ENVIRONMENT

things such as minerals, forests, coal, etc. that exist in a place and can be used by people:

2) Read the questions and complete with the correct word/s.

- Are humans causing or contributing to _____?
- What do people do to protect the _____?
- What type of _____ is mined from the ground?
- What will we do when _____ finally run out?
- Why is _____ so important and worthy of protection?
- Do you think _____ will be stopped at one point in the future?
