

UNIT 5: WEIRD AND WILD ANIMALS

Lesson 1: Vocabulary

Exercise 1: Look and write. Then match.

angler fish

coconut crabs

tarsiers

Tasmanian devils

vocalno rabbits

1 _____

2 _____

3 _____

4 _____

5 _____

a They've got long teeth and they live in oceans all over the world. We don't know how many there are.

b They've got big eyes and brown fur. They live in Southeast Asia but we don't know their population.

c They've got a population of more than 100,000 and they live on islands in the Pacific Ocean. They're orange and brown.

d They've got grey fur and they live on volcanoes in Mexico. They've got a population of between 2,000 and 12,000.

e They've got black and white fur. They've got a population of between 10,000 and 25,000 and you can find them in Tasmania.

Exercise 2: Listen and write.

Understanding Animals

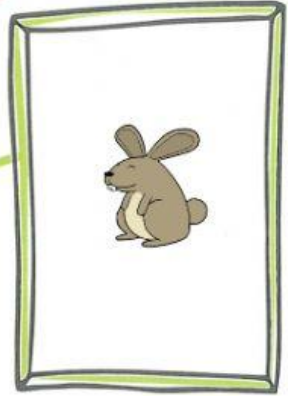

Do you know a lot about animals?
How many different kinds there are?

Some are ¹ _____ and

Some are ² _____

And some are just bizarre!

Understanding animals is good for us to do
Because learning about animals helps us
And helps them, too!

Some live in ³ _____ or in the ⁴ _____

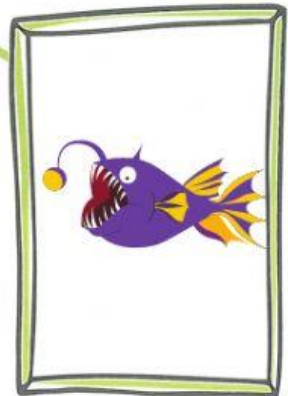

And some live where it's hot.

Some are beautiful and some are cute
And some are... well, they're not!

Chorus

It's important to learn about animals,
Though many seem strange, it's true.
Because when we learn about animals,
We learn about ourselves, too.

Chorus

**Exercise 3: Can you name
more WILD animals?**

big	small	live in trees	live in the sea
