

MSEXCEL – CELL ADDRESS

A cell address, also referred as cell reference, is more than just a name that identifies the cell. It also gives you direction on how to find a specific cell. For example, cell B2 can be found in column B and in row 2.

B2			
	A	B	
1			
2			
3			

Instructions: The table below has some names of a few girls. Locate them and write the cell address for each name on the line provided.
