

PLANETS IN THE SOLAR SYSTEM

Novieto terminu un tekstu atbilstošajās vietās

ONE YEAR INIS
EQUAL TO 165 YEARS ON
EARTH.

**MARS VENUS MERCURY
URANUS NEPTUNE**

.... has the lowest temperature of all
the planets, with a minimum
atmospheric temperature of -224°C .

SATURN

Saturn's orbit
around the Sun
is every 29.4
Earth years

JUPITER

The Great Red Spot visible
in Jupiter is a storm that
has been going on for at
least 350 years. It is
massive enough to fit three
Earth-sized planets in it.

One day inis longer
than one day on Earth.

...has two moons and is the
last of the terrestrial planets
along with Mercury, Venus,
and Earth.

This is the first planet closest to the
Sun and the smallest in our solar
system.

EARTH

Earth was once believed to
be the center of the
universe, until it was
debunked by Galileo Galilei.

FUN FACT: PLUTO IS NO LONGER
CONSIDERED A PLANET SINCE 2006!
