

GREEN ISSUES

1. Drag and drop the vocabulary words under the correct picture.

					
	environment				
					
					
					

environment	global warming	plastic	glass	metal	factory
outdoors	carbon dioxide	countryside	earthquake	poison	forest
climate	lake	sea	pollution	earth	temperature
smog	waste	plant trees	ozone layer	oil	recycle

GREEN ISSUES

2. Read the text and answer the questions.

The earth

A morning like any other, the Earth awoke and opened his eyes. It stopped to look at itself and appreciated big changes that left thoughtful. It found that its waters were not as clean as before and as marine animals died because of the large oil spills and pollution.

The woods were getting smaller because of the indiscriminate felling to which they were subjected, and the places where standing trees were still running the same risk of dry lands. The air was unbreathable and the ozone layer disappeared. All this happened because of environmental pollution. It felt hotter because the temperature had risen due to global warming.

Our planet was in despair at seeing so many animals to be hunted or died were homeless or food. Suddenly realized that was in danger of extinction like the poor and defenseless animals. The only and blame for all this was the man.

What happened in the water?

- a) Were not so clean.
- b) The marine animals were alive.
- c) Was cold.

Why the air was unbreathable?

- a) Because the weather was freezing.
- b) Because of the environmental pollution.
- c) Because the ozone layer.

Why the earth had temperature?

- a) By the dry lands.
- b) By the global warming.
- c) By the sun.

Why the animals were in danger of extinction?

- a) Because they were hunted.
- b) Because they didn't have food.
- c) Because there wasn't water.

Who is the blame of everything that was happening?

- a) The animals.
- b) The presidents.
- c) The man.
