FUTURE MATTERS

1. Drag and drop the vocabulary words under the picture.

energy efficient	renewable energy	wind energy	gas energy	solar energy
artificial intelligence	Fuel efficiency	Smart cars	technology	transports
computers	tables	smartphones	3D technology	applications

2. Write the correct word under the picture.

Alarm clock - Global positioning system – Toaster – Teenagers

a  _____

b  _____

c  _____

d  _____

LIVEWORKSHEETS

FUTURE MATTERS

3. Read the text and answer the questions.

Life in the future

What will life for teenagers be like in the year 2050? For a start, computers will be everywhere and they'll do everything for us. We won't have alarm clocks in the future. A picture in your bedroom will become a computer screen and it'll wake you up and say hello. You'll walk into the kitchen and the toaster and coffee machine will recognize your voice and automatically make you your breakfast.

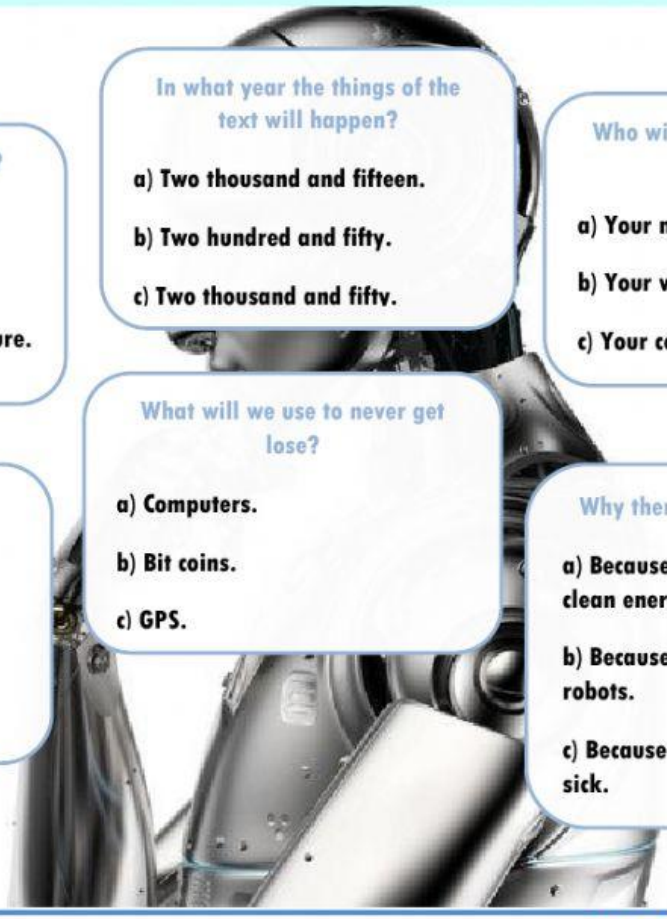

Your computer will remind you to do your homework. You won't need text books because they will be digital. You'll walk to school as usual. On the way you decide to buy a snack at a café. You'll use a smart card to pay for it, because nobody carries money any more. You won't need a PIN number for your smart card, because a laser will scan the iris of your eye and identify you.

In your classroom the top of your desk will become a computer screen. You'll touch the screen to connect to the Internet, but you won't need to write anything because it will be saved in your mind.

You won't have to go to the shopping center to buy your clothes. You'll buy a sweater online and it'll be the right size because a computer will scan your body.

Everyone will have a touch screen phone with GPS, so you'll never get lost. The bad news is that your parents will use the GPS to know exactly where you are!

People won´t get sick because pollution will disappear, everyone will use clean energy.

What is the text's main idea?

a) **Predict things about future.**

b) **Inform about the future.**

c) **Show live of people of the future.**

In what year the things of the text will happen?

a) **Two thousand and fifteen.**

b) **Two hundred and fifty.**
