

Think Addition to Subtract

Directions: Use the addition facts to check the difference.

$$9 - 4 = \boxed{} \text{ so } 4 + \boxed{} = 9$$

$$7 - 4 = \boxed{} \text{ so } 4 + \boxed{} = 7$$

$$12 - 8 = \boxed{} \text{ so } 8 + \boxed{} = 12$$

$$11 - 6 = \boxed{} \text{ so } 6 + \boxed{} = 11$$

Now, make up a problem of your own.

$$\boxed{} - \boxed{} = \boxed{}$$

so $\boxed{} + \boxed{} = \boxed{}$
