THE FUTURE OF TALL BUILDINGS

Read the text below. Use the word in capitals to form a word that fits in each space.

Architects responsible for the (1) of many skyscrapers believe that a tall building must always have a certain minimum (2) but	CONSTRUCT WIDE
	derinativiscontrols
that there is no limit to its absolute (3) This means that the	HIGH
skyscrapers of the future are likely to be even taller.	
Engineers agree with this, but there is (4) over the best shape	AGREE
for very tall, slim buildings. The effects of wind (5) mean that	PRESS
cylindrical designs have enjoyed some (6) in recent years, and	POPULAR
these are quite pleasing to the eye. (7), however, the ideal shape	FORTUNATE
is an ugly square with heavily rounded corners.	MARKET BANKS SAN
Would these tall buildings of the future offer more than a (9)	WONDER
view? Some believe tall towers could contain all the (10) for	REQUIRE
modern living. The (11) of these vertical villages would travel up	INHABIT
and down between their home and work zones and would (12) need	RARE
to journey to ground level.
