

The Environment

Endangered species global warming eco-friendly products eco-tourist
alternative energy sources conservation green belt

Fill in the blanks with the correct answers.

Hi Amira,

I hope you are in the pink. I would like to share with you about 'The Environment' that I learn in school.

Sadly, there are a lot of environmental problems happen nowadays such as acid rain, polluted beaches and destruction of forest. One of the most serious problem is destruction of forests which has caused the extinction of

Thus, a great precaution must be taken. As a responsible human being, we should first, consider to buy whenever we go shopping. These products are not harmful to the environment.

Second, whenever we plan going for traveling, make sure we educate ourselves to be an who will never harm the environment. If you are sight-seeing around the city, make sure to observe from a far the area so that the forest is not disturbed. The same goes if you visit a area in the countryside!

For your information, I also learn that the most worrying environmental problem is . Nowadays, I find it hard to sleep at night without turning on my air conditioner! It shows how bad climate change is taking place.

One of the ways to save the earth is by using such as the power generated from wind, sun and water. It can help to reduce the heat. I know it is pretty expensive to install the panels but it will worth it! Trust me!

I think that's all. Let's save the environment! See you soon.
